

QUALITY POLICY

The UTECH group of companies provide professional survey services and equipment globally and we, as a group, are committed to achieving the highest standards of quality in all of our business activities. We have developed and implemented a quality management system which uses ISO9001 as a framework. The senior management of UTECH have committed to using this management system to ensure we comply with legislative and contractual requirements, continually improve our performance in all areas of business, ensure customer satisfaction, and to achieve our overall goal of being a leader in the services we provide.

We will achieve our overall goal by:

- Senior management demonstrating quality leadership and all personnel taking responsibility for their individual performance and the performance of those they manage;
- Establishing measurable quality objectives, at all levels within the company, which are consistent with this policy and our overall goal;
- Ensuring that this policy and our objectives are communicated to, and understood by, all personnel;
- Monitoring, measuring and analysing the effectiveness of our processes;
- Ensuring that effective audit, reporting and corrective action processes are implemented across the group;
- Senior management reviewing our quality policy, objectives and management system performance, at planned intervals, to ensure continued suitability, adequacy and effectiveness, and where necessary to identify and implement changes that are required including opportunities for improvement;
- Planning and managing our survey services to eliminate or minimise risk and get it right first time;
- Providing adequate resources and training to ensure all activities are performed to the highest standard; and,
- Ensuring subcontractors and key suppliers apply quality standards that are compatible with those of UTECH.

Responsibility for the implementation of this policy is an integral part of the duties of senior management, managers, supervisors and employees. Responsibility for monitoring the effectiveness of the policy and compliance with its requirements has been delegated by the CEO of UTECH to the Global QHSE & IT Manager, who acts as the Quality Representative. He has the resources, organisational freedom and authority to identify non-compliance with the policy and supporting systems, and to request immediate preventive or corrective action.

To ensure its continued suitability our Quality Policy will be reviewed annually as a minimum, and will also be reviewed when necessary due to change.
